Draft River Basin Management Plans

Water matters "Help Us Plan!"

A new approach is being taken to managing and protecting our natural waters (rivers, lakes, estuarine, coastal and ground waters). This has resulted in Ireland being divided into a number of river basin districts. Draft management plans have now been prepared for each of these River Basin Districts which set out a roadmap as to how the status of our natural waters will be protected and restored where necessary. A series of public information events on the draft plans is being held nationwide at the venues below. You are invited to come along and find out what is proposed to manage the waters in your area and how it might affect you. **Each event will run from 4.00 to 8.00 pm.** If you wish to find out more log onto the website www.wfdireland.ie or telephone 074 916 1927.
